

Print this A4 sheet double sided and trim to the cross hairs on this first page.

To avoid damaging the spine of your Supplement No 1, the trim marks produce a slightly narrower sheet that can be tipped in after p34 without the need to force open the spine.

(Please note, this layout has been compiled for a Canon inkjet printer, different manufacturers may produce slightly differently aligned results. Please ensure any scaling options are set to 100% or off.)
